ABOUT dna

DERMATOLOGY NURSES' ASSOCIATION®

*Nurses Serving Nurses
for more than 30 years!*

The Dermatology Nurses' Association (DNA) is a professional nursing organization comprised of a diverse group of individuals committed to quality care through sharing knowledge and expertise. For more than 30 years, DNA has promoted excellence in dermatological care, education and certification. The DNA is the longest-standing dermatology nursing association in the United States and Canada with more than 3,000 members covering all dermatologic specialties and with all levels of education and certification.

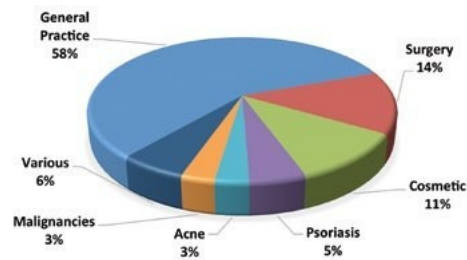

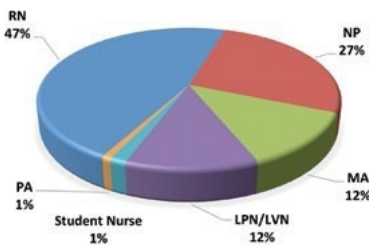

Nurse Practitioner Highlights

Did you know that more than **25%** of the DNA membership consists of Nurse Practitioners (NPs) These highly educated practitioners are leaders in patient care in hospitals and private practice and have interest and knowledge in prescription medications, emerging medical technologies and research.

These valued professionals are also members of DNA's Nurse Practitioner Society, which provides a forum for collaboration, targeted education and networking among the DNA NPs. The NP Forum, co-located with the DNA Annual Convention, is an intensive, two-day educational event highlighting the issues confronting today's dermatology NPs.

76%
of dermatology professionals are DNA members because of the **educational** and **networking** opportunities the association provides.

BECOME A DNA CORPORATE MEMBER

Corporate Members' support of DNA helps provide educational opportunities for nurses working in the dermatological space. Advocacy, an important part of the DNA's mission, gives nurses the voice they need to represent their patients. DNA provides opportunities for nurses to network with other professionals and exchange ideas while providing scholarships for other professional growth opportunities.
